

GROWTH MINDSET: MAXIMIZING YOUR POTENTIAL

How Mindset Affects Academic Performance

For many kids, a bad grade on a test or getting cut from a sports team is devastating. "I'm just not a math person," they'll tell themselves. Research shows these labels have an outsized impact on their development. Learn about Growth Mindset, and how it drives positive outcomes both inside and outside the classroom.

During this presentation, you will discover:

- That through effort, anyone can improve at anything
- That failure can be a catalyst for growth and development
- That your child's academic potential isn't defined by their past results or innate ability
- How to foster a Growth Mindset in students
